

As with most schools, we have now fully embedded the new national curriculum. We have decided to teach using a topic based approach to add relevance and to allow children to discover the important links between different curriculum areas. Below you can see the Year 5 topic umbrella for Whitsun term. Our topic is 'Chocolate' and you can see how the different subjects link together under common Geography/history topics. (Maths and some other subjects have not been included because curriculum requirements mean that they are usually taught as separate subjects.) Children will be given the opportunity to research and pursue areas of personal interest within the topic and are encouraged to bring in any relevant artefacts, books or photos etc. The topic will begin with our trip to Cadbury's World!
