Research what it was like for children in a given period of history. Victorian times – a local study

Know the names of 4 countries in both the Southern and Northern hemisphere

Know the names of and locate at least 8 European countries

NATURAL DISASTERS

What Does a Plant Need to Grow?

SCIENCE PLANTS

Key vocabulary	Definition
Roots	These anchor the plant into the ground and absorb water and nutrients from the soil.
Stem	This holds the plant up and carries water and nutrients from the soil to the leaves. A trunk is the stem of a tree.
Leaves	These make food for the plant using sunlight and carbon dioxide from the air.
Flowers	These make seeds to grow into new plants. Their petals attract pollinators to the plant.
